# Vitor Alecrim

Full Stack Web Developer

Salvador, Bahia, Brasil

## Resumo

I'm a developer with four years of experience, focused on developing responsive, mobile-friendly websites and web apps for small and midsize companies, and singular clients. Since the begin have been a wild journey.

I am interested in ecosystems with, frameworks like React, Nextjs, Vuejs, Nuxtjs, and ReactNative.

My skills:

- Html, CSS/Scss,
- Javascript, typescript and PHP.
- ReactJs, NextJs, React-Native, Nodejs, VueJs and Nuxtjs
- tailwindCss and Bootstrap
- npm, yarn
- git

I'm currently open to remote work opportunities, and actively seeking full-time positions as a web developer.

## Experiência

FLAT

Full Stack Developer

janeiro de 2018 - Present (5 anos)

I provide services to other companies and singular clients.

my key responsibilities:

- Translating Figma files to website.
- Creating modern singpage applications using modern framework as Reactjs and Nextjs
- Creating webapps with Reactjs and Nodejs.
- API integrations
- Refactoring existing projects.
- Websites and webapps hosting and deployment.
- Support client's websites; fixing designs and implementing new features

- Providing web development related consultancy to clients, IT professional and students

Fabuloso Laboratório de Arte e Ofício  
Escritor e Cineasta

### Plano B Design

Frontend Web Developer

junho de 2021 - outubro de 2022 (1 ano 5 meses)

14-months contract developer. My main duties were to give support to their client's existing websites, creation of new websites for their clients, and integration with their cms platform called Shiro.

Key responsaibilites:

- Translating design files to static websites (HTML, Javascript, PHP, CSS).
- Shiro API integration to frontend.
- API calls managment (to reduce slow page rederization).
- Desing support: fixing design bugs and mobile responsivity and adaptation.
- Support to frontend websites' legacy code.
